

Vaibhav Ajmani

Senior Business Systems Analyst | Data & Product Delivery

Waterloo, Ontario | +1 (571) 577-5347 | vaibhavajmani.github.io | vaiajm2793@gmail.com | linkedin.com/in/vaibhav-ajmani

PROFESSIONAL SUMMARY

Senior Business Systems Analyst with **6+ years** driving financial operations excellence in complex, matrixed organizations. Proficient in SQL-based data analysis and process automation, identifying **\$1.5 Million+** in billing discrepancies and streamlining payment processing for **8 million+** monthly transactions. Proven leader bridging business and technical teams, delivering automated solutions across **7,000+** hospitality properties. CEO Award recipient (top **1.2%** of employees) for exceptional cross-functional collaboration and operational impact.

CORE COMPETENCIES

Financial Operations: Revenue Analytics, Billing Operations, Payment Processing, Financial Reporting, SOX Compliance

Business Intelligence & Analytics: SQL, Power BI, Tableau, Data Validation, KPI Dashboard Development

Product & Project Leadership: Agile/Scrum Delivery, Backlog Prioritization, Roadmap Development, Requirements Translation

Stakeholder & Change Management: Executive Communication, Cross-functional Collaboration, User Training, Process Adoption

Technical Systems: Enterprise Systems Integration, API Development, ETL Processes, System Administration

Compliance & Governance: SOX Compliance, Internal Controls, Audit Coordination, Financial Reporting

PROFESSIONAL EXPERIENCE

Choice Hotels International | Bethesda, MD, USA

Senior Technical Analyst, Finance IT | September 2023 - Present

Lead enterprise financial operations and production support across **\$700 Million** in annual billing revenue, serving **7,000+** properties through data analysis, system optimization, and cross-functional coordination with **10+** internal teams and **3** external vendors.

Revenue Recovery: Identified **\$590,000** in failed payment transactions through SQL analysis of **8 million+** monthly records, implementing monitoring systems that reduced payment failures by **90%**.

Payment Data Recovery: Recovered **2,785** CyberSource payment transactions blocked from posting to financial applications, and led migration of **979** payment tokens to production with zero payment disruption.

Data Quality Management: Identified and resolved a **\$500,000** billing discrepancy impacting **317** customers through systematic data validation and root cause analysis, preventing revenue loss and preserving customer relationships.

Fee Recovery: Drove resolution of a data mapping defect affecting **22,000+** transactions, recovering **\$267,844** in previously uncalculated marketing and commission fees.

Process Automation: Engineered automated audit frameworks processing **400,000+** monthly transactions, reducing manual review effort by **40%** and eliminating **\$15,000-\$20,000** in monthly billing errors (**\$200,000+** annually) through systematic validation controls.; also automated monthly delivery and load of a **\$250,000** charges file, removing manual intervention and ensuring on-time month-end processing.

System Integration Leadership: Coordinated a triple-system transition - ERP retirement, new direct billing integration, and platform upgrade affecting **\$700 Million** in annual revenue - achieving zero downtime and cutting data-flow latency from **24+ hours to ~15 minutes**.

Requirements & Delivery Management: Translated business requirements from **15+** stakeholders into **100+** user stories (**98%** first-review approval), facilitated **20+** quarterly UAT sessions across **5** departments, and drove **90%+** user adoption within **60 days** through comprehensive training and change management.

Stakeholder Management: Serve as primary business liaison across **10+** business units (Finance, Legal, Operations, IT), facilitating requirements gathering and executive alignment, and consistently earning positive feedback from C-suite, VP, and Director-level stakeholders.

Compliance & Audit: Serve as PeopleSoft application administrator across AR, AP, and Billing, owning quarterly SOX controls and documentation with zero audit findings across **5** consecutive quarters; supported external audit by **Ernst & Young** and the PeopleSoft finance-application migration reviewed with **PwC**.

Cross-functional Project Delivery: Lead agile teams of **5-8** members (developers, analysts, QA), delivering **12+** critical system enhancements on schedule with **95%** stakeholder satisfaction and zero post-launch defects.

Risk Mitigation: Eliminated a critical single point of failure by serving as interim System Administrator for **6 months**, maintaining **100%** system availability while training a replacement administrator and documenting **50+** critical processes.

OCR Services, Inc. (Acquired by Descartes Systems Group) | Rockville, MD, USA

AR Manager | January 2023 - September 2023 | Business Data Analyst | August 2020 - December 2022

Advanced from entry-level analyst to AR Manager within **2.5 years**, leading a team of **2** while driving analytics initiatives across sales, marketing, and finance; managed **\$15 Million+** in annual receivables while spearheading business intelligence, process automation, and system implementation projects.

AR Operations & Analytics: Managed **\$15 Million+** annual receivables across **50+** accounts, reducing DSO from **45 to 32 days** through data-driven collection strategies, SQL-based risk analysis, and automated dunning workflows.

Business Intelligence Development: Created **15+** Power BI dashboards tracking KPIs across sales, marketing, finance, and collections, improving decision-making speed by **30%** for C-suite executives.

Cash Flow & Risk Analysis: Analyzed payment trends and aging reports using SQL and Excel, identifying **\$800,000** in at-risk receivables and implementing proactive outreach programs that improved collection rates by **25%**.

SQL Development & Optimization: Developed **100+** complex SQL queries enabling real-time reporting for **25+** users across sales, finance, and operations teams.

Requirements Analysis: Gathered and documented requirements for **10+** enterprise projects, translating business needs into technical specifications with a **98%** first-submission acceptance rate, reducing rework cycles by **50%**.

Agile Project Management: Managed **3-5** concurrent projects and product backlog priorities, facilitating sprint planning using Scrum with **15+** stakeholders and maintaining a **100%** on-time delivery rate across **40+** sprints.

Process Improvement: Led **8** process optimizations saving **20+ hours** weekly through automation, including AR reconciliation enhancements that reduced month-end close time by **2 days**.

Quality Assurance: Designed and executed test plans for **30+** features, identifying and resolving **50+** defects pre-production and achieving **99%** production stability.

SELECTED PROJECTS

Portfolio / concept work using fictional companies and industry-standard patterns. Full write-ups at vaibhavajmani.github.io.

FlowBridge - Salesforce and Zendesk Integration (Business Analysis): Concept case study for a B2B SaaS company losing customers because its sales (Salesforce) and support (Zendesk) systems could not share data. Delivered stakeholder register, as-is and to-be process flows, functional and non-functional requirements, user stories, and an options analysis. Projected renewal churn reduction from **12% to under 7%** and first-response time from **4.2 hours to under 2 hours**.

Sales Analytics in Power BI (Data Analysis): Interactive Power BI report for a fictional bike retailer selling across **6** countries, pairing an executive KPI dashboard with diagnostic views (Key Influencers, Decomposition Tree, and clustering) to explain what drives sales and where revenue concentrates. Published to GitHub Pages with a context, approach, and outcome write-up.

Event-Driven Cloud Data Pipeline (Solution Architecture). Interactive AWS reference architecture that moves data nightly from a SaaS export through Kafka, S3, Lambda, Redshift, SQS, and a target API, with CloudWatch and Grafana observability. Documented each design decision and trade-off, with a live pipeline simulation and cost model, published as a standalone interactive page with a GitHub README.

TECHNICAL SKILLS

Business Intelligence & Analytics: SQL (Proficient), Power BI, Tableau, Excel (Microsoft Certified Expert)

Financial & Enterprise Systems: PeopleSoft, Oracle Fusion, Enterprise Cloud Billing (ECB), CyberSource Payment Gateway

Integration & Development: MuleSoft, Apache Kafka, REST APIs, ETL Processes

Cloud & Infrastructure: AWS (S3, CloudWatch, Lambda)

Project & Collaboration Tools: Jira, Confluence, ServiceNow, SharePoint, Agile/Scrum

Compliance & Governance: SOX Compliance, Internal Audit Processes, Financial Controls, Documentation Management

EDUCATION

Master of Science, Information Technology, Data Management & Analytics - Washington University of Science and Technology, Vienna, VA, USA | GPA: 4.0 | March 2023 | President's List

Bachelor of Business Administration, Project Management - Washington University of Science and Technology, Vienna, VA, USA | GPA: 3.94 | June 2020 | President's List

CERTIFICATIONS & RECOGNITION

CEO Recognition Award, Choice Hotels International (2025) - Top **1.2%** of employees for exceptional performance.

PMI Agile Certified Practitioner (PMI-ACP) - Agile/Scrum delivery methodologies.

Microsoft Excel Expert (Microsoft 365) - Advanced analytics and data manipulation.

CyberSource Documentation Update (2024) - Identified a critical ACH payment processing issue that led CyberSource (Visa) to update their official technical documentation, reducing industry-wide payment failures.
